

# Wooden Pallets & Packaging Solutions

## Sustainable Wood Sourcing

We supply responsibly harvested wood from PEFC certified sources, ensuring traceability, environmental care, and long-term forest health. Our multi-site certification guarantees a consistent and controlled value chain.

## Why It Matters

Using certified, treated wood ensures durability, safety, and compliance with international standards. Whether for pallets, packaging, or construction, our wood solutions minimize risk, extend lifespan, and support sustainable practices

### KEY BENEFITS

**Local & Regional Supplies**  
Sourced from certified mills across GCC to ensure consistent availability and cost efficiency

**High Quality Standards**  
Every shipment meets international compliance and wood treatment standards.

**Reliable & On-Time Delivery**  
Stock availability + optimized logistics = your project never stops.

## Wood Solutions Built for Your Needs

Whether it's pallets, lumber, or custom-cut wood, we provide solutions you can trust for every project

### Refurbished Pallets

**1** Reliable and cost-effective pallets, carefully restored to maintain durability while reducing waste.

### New Wooden Pallets

**2** Strong, high-quality pallets built for heavy loads and consistent performance. Ideal for shipping, storage, and industrial applications.

### Custom Pallets

**3** Tailor-made pallets designed to fit your exact size, weight, and handling requirements.

### Wood Crates & Packaging

**4** Secure and sturdy wooden crates to protect equipment and goods during transport or storage.

### Heat Treatment Wood Solutions

**5** Our wood is carefully heat-treated in industrial kilns to eliminate insects, larvae, and fungi, ensuring it meets the international standard for safe export and global compliance. This treatment enhances durability, protects the wood from biological threats, and ensures it is suitable for industrial and packaging applications. Steam treatment is also applied to further stabilize the wood.
